ORPEA

LIFE GOES ON WITH US

- ✧ Issue of ORNANE for €198m on 9 July 2013: premium of 27%, annual interest rate of 1.75% and maturity January 2020
- ✧ **IFRS rules for treatment of convertible bonds:**
 - OCEANE: exact number of shares to be created in case of conversion is known => impact on shareholders' equity
 - ORNEANE: number of shares to be created not known at time of issue (because subject to decision by Board of Directors) => impact on income statement

This impact is the inverse of the trend in the share price (non-cash charge if the share price rises, non-cash income if the share price falls).

On maturity: neutral effect on shareholders' equity:

 - in the event of non-exercise, cancellation of previous income and charges
 - in the event of exercise, neutralisation by shareholders' equity
- ✧ The share price rose by 21% in the H1 2014, resulting in a mark-to-market net of tax of €14.2m
- ✧ Consolidated net income attributable to equity holders of the parent taking account of the fair value of the conversion option: €50.2m
